To,

**M/s. Bhaveshwar Infratech,**  
E-401, Ashok Vihar Chs. Ltd.,  
Marol Military Road, Andheri,(E)  
Mumbai 400 072.

**SUB :- Development Permission for Residential cum Commercial Building on Plot No.- C-7/2, Sector- 12, At.- Kalamboli, Tal.- Panvel, Dist.- Raigad.**

**REF :-** 1) Your Architect's application no. 6795, Dated 22/03/2022.  
2) Height Clearance NOC issued by AAI vide letter No. NAVI/WEST/B/012922/651592, Dated 22/02/2022.  
3) Provisional Fire NOC issued by PMC Fire officer vide letter no. PMC/Fire/2121 /Ref. no.600/1605/2022, Dated 26/04/2022.

Sir,

Please refer to your application for Development permission for Residential cum Commercial Building on Plot No.- C-7/2, Sector- 12, At.- Kalamboli, Tal.- Panvel, Dist.- Raigad.

The Development permission is hereby granted to construct Residential cum Commercial Building on the plot mentioned above.

The Developers / Builders / Owners shall take all precautionary measures for prevention of Malaria breeding during the construction period of the project. If required, you can approach Health Department PMC, for orientation program and pest control at project site to avoid epidemic.

You have to pay the necessary charges due to GST if applicable in future as per Panvel Municipal Corporation policy and as informed to you in writing and if not paid the permission granted will be revoked.

You will ensure that the building materials will not be stacked on the road during the construction period.

It is well aware that the State of Maharashtra is threatened with the spread of COVID-19 Virus and therefore, to take certain emergency measures to prevent and contain the spread of the virus the Govt. of Maharashtra & Hon. Commissioner, PMC issued the guidelines from time to time. Considering these facts, this C.C. / Plinth checked Certificate / O.C. is issued, subject to strict compliance of terms & conditions as mentioned in Annexure-A attached herewith.

Thanking you,

**मा. आयुक्त यांचे मंजूरी नुसार**

Assistant Director of Town Planning  
Panvel Municipal Corporation

## COMMENCEMENT CERTIFICATE

Permission is hereby granted under section – 45 of the Maharashtra Regional and Town Planning Act.1966 (Maharashtra XXXVII of 1966) to, **M/s. Bhaveshwar Infratech**. As per the approved plans and subject to the following conditions for the development work of the **Proposed Residential cum Commercial Building (Ground + 05 Upper Floors) on Plot No.- C-7/2, Sector- 12, At.- Kalamboli, Tal.- Panvel, Dist.- Raigad. (Plot Area = 3893.48 Sq.mt., Residential 4806.805 sq.mt., Commercial Built Up Area = 1029.346 sq.mt., Total Built Up Area = 5836.151 sq.mt.)**

(No. of Residential Unit – 83 Nos., No. of Commercial Shop / office – 14 Nos., No. of Total Uni – 97 Nos.)

1. **This Certificate is liable to be revoked by the Corporation if:-**
  - 1(a) The development work in respect of which permission is granted under this certificate is not carried out or the use thereof is not in accordance with the Sanctioned plans.
  - 1(b) Any of the conditions subject to which the same is granted or any of the restrictions imposed upon by the corporation is contravened.
  - 1(c) The commissioner is satisfied that the same is obtained by the applicant through fraud or Misrepresentation and the applicant and / or any person deriving title under him, in such an event shall be deemed to have carried out the development work in contravention of section – 43 or 45 of the Maharashtra Regional and Town Planning Act- 1966.
2. **The applicant shall:-**
  - 2(a) The Owner / Applicant shall give intimation in the prescribed form in Appendix-F of UDCPR 2020 after the completion of work up to plinth level.
  - 2(b) Give written notice to the Corporation regarding completion of the work.
  - 2(c) Permit authorized officers of the Corporation to enter the building or premises for which the permission has been granted, at any time for the purpose of ensuring the building control Regulations and conditions of this certificate.
  - 2(d) Obtain Occupancy Certificate from the Corporation.
3. The structural design, building materials, installations, electrical installations etc. shall be in accordance with the provision (except for provision in respect of floor area ratio) as prescribed in the National Building Code.
4. The Commencement Certificate shall remain valid for a period of 1 year from the date of issue and can be further revalidated as required under provision of section 48 of MRTPA Act.-1966. This Commencement Certificate is renewable every year but such extended period shall be in no, case exceed three years provided further that such lapse shall not be any subsequent applicant for fresh permission under Section 44 of the Maharashtra Regional & Town Planning Act. 1996.
5. The conditions of this certificate shall be binding not only on the applicant but also on its successors and/or every person deriving title through or under him.
6. Prior Permission is necessary for any deviation / Change in Plan.  
The Owner / Developer shall install the Rain Water Harvesting system as per UDD's notification No. TPB/432001/2133/CR-230/01/UD-II, Dated 10/03/2005 & UDCPR.

- d) Number of Residential flats/Commercial Units with areas.
- e) Address where copies of detailed approved plans shall be available for inspection.
- ii) A notice in the form of an advertisement, giving all the detailed mentioned in (i) above, shall be published in two widely circulated newspapers one of which should be in regional language.
23. As per the notification dtd. 14<sup>th</sup> September 1999 and amendment on 27<sup>th</sup> August 2003, issued by Ministry of Environment & Forest (MOEF), Govt. of India and as per Circular issued by Urban Development Dept., Govt. of Maharashtra, vide No. FAR/102004/160/P.No.27/UD-20, dtd. 27/02/2004, for all Buildings following additional conditions shall apply.  
**The owners / Developers shall use fly ash Bricks or Blocks or Tiles or Clay fly ash Bricks or cement fly ash bricks or blocks or similar products or a Combination of aggregate of them to the extent of 100% (by volume) of the total bricks, blocks & Tiles as the case may be in their construction activity.**
24. The building material in reconstruction case or soil removed from the trenches should not be dumped or stored on municipal road. It should be dumped or stored on site as would be decided by the concern Ward Officers of Panvel Municipal Corporation.
25. The Owner / Developer should fulfill all the health related provisions mentioned in the "Implementation of Ant larval & Mosquito Prevention Activities during and after construction and Tree Authority Bye-Laws 1966" The special mention is for mosquito prevention activities, construction of over-head tanks, debris removal and the sanitary conditions of drainage etc.
26. Workers should be accommodated at a distance of 25 to 35 feet from the protective walls of adjacent buildings on all sides of the construction site and also from the place where excavation has started. The developer should also arrange accommodation as per the standard in Section 34 of the Building and Other Construction Workers (Employment Regulation and Conditions of Service) Act, 1996.  
- Accommodation :-
1. The employer shall provide, free of charges and within the work site or as near to it as may be possible, temporary living accommodation to all building workers employed by him for such period as the building or other construction work is in progress.
  2. The temporary accommodation provided under sub-section (1) shall have separate cooking place, bathing, washing and lavatory facilities.
  3. As soon as may be, after the building or other construction work is over, the employer shall, at his own cost, cause removal or demolition of the temporary structures erected by him for purpose of providing living accommodation cooking place or other facilities to the buildign workers as required under sub-section (1) and restore the ground in good level and clean condition.
  4. In case an employer is given any land by a Municipal Board or any other local authority for the purposes of providing temporary accommodation for the building workers under this section, he shall, as soon as may be after the construction work is over, return the possession of such land in the same condition in which he received the same.
27. The workers 'quarters should be 25 to 35 feet away from the trees on the construction site so that if the tree falls, the workers' residence will not be endangered.
28. Special care should be taken to ensure that the colony on the construction site is not endangered by electricity and fire.
29. In construction sites where rivers, streams, nallas and natural water streams are in operation, special care should be taken for the safety of the workers and their place of residence should be 50 feet away from such streams.
30. Those working on the construction site must be registered under Section 15 of the "Building and Other Construction (Employment Regulation and Conditions of Service) Act, 1996"  
Section :- 15 Register of beneficiaries :- Every employer shall maintain a register in such form as may be prescribed showing the details of employment of beneficiaries employed in the building or other construction work undertaken by him and the same

## SCHEDULE RAIN WATER HARVESTING

Rain Water Harvesting in a building site include storage or recharging the ground water by rainwater falling on the terrace or on any paved or unpaved surface within the building site. The following systems may be adopted for harvesting the rainwater drawn from terrace and the paved surface.

- i) Open well of a minimum 1 m. diameter and 6m. in depth into which rain water may be channeled and allowed to filter for removing silt and floating material. The well shall be provided with ventilating covers. The water from the open well may be used for non-potable domestic purposes such as washing, flushing and for watering the garden etc.
- ii) Rain Water Harvesting for recharge of groundwater may be done through a bore-well around which a pit of 1m. Width may be excavated up to a depth of at least 3m. and refilled with stone aggregate and sand. The filtered rain water may be channeled to the refilled pit for recharging the bore-well.
- iii) An impressive surface/underground storage tank of required capacity may be constructed in the setback or other open spaces and the rain water may be channeled to the storage tank. The storage tank shall always be provided with ventilating covers and shall have draw-off taps suitably placed so that rain water may be drawn off for domestic, washing, gardening and such other purposes. The storage tank shall be provided with an overflow.
- iv) The surplus rain water, after storage, may be recharged into ground through percolation pits or trenches or combination of pits and trenches. Depending on the geomorphological and topographical conditions, the pits may be of the size of 1.20 m. width X 1.20 m. length X 2m. to 2.50 m. depth. The trenches can be of 0.60 m. width X 2 to 6 m. length X 1.50 to 2 m. depth. Terrace water shall be channeled to pits or trenches. Such pits or trenches shall be back filled with filter media comprising the following materials :-
  - a) 40 mm stone aggregate as bottom layer up to 50% of the depth.
  - b) 20 mm stone aggregate as lower middle layer up to 20% of the depth.
  - c) Coarse sand as upper middle layer up to 20% of the depth.
  - d) A thin layer of fine sand as top layer.
  - e) Top 10% of the pits/trenches will be empty and a splash is to be provided in this portion in such a way that roof top water falls on the splash pad.
  - f) Brick masonry wall is to be constructed on the exposed surface of pits/trenches and the cement mortar plastered. The depth of wall below ground shall be such that the wall prevents lose soil entering into pits/ trenches. The projection of the wall above ground shall at least be 15 cm.
  - g) Perforated concrete slabs shall be provided on the pits/trenches.
  - h) If the open space surrounding the building is not paved, the top layer up to a sufficient depth shall be removed and refilled with coarse sand to allow percolation of rain water into ground.
- v) The terrace shall be connected to the open well/bore-well/storage tank/ recharge pit/trench by means of HDPE / PVC pipes through filter media. A valve system shall be provided to enable the first washing from roof or terrace catchment, as they would contain undesirable dirt. The mouth of all pipes and opening shall be covered with mosquito (insect) proof wire net. For the efficient discharge of rain water, there shall be at least two rain water pipes of 100 mm. dia. for a roof area of 100 sq.m.
